PROFESSIONAL & WORK EXPERIENCE

Lab Analyst - Data Analyst	2022-2023
·	
• Implemented new Power BI models to summarize work hours, automate additional KPIs,	
statistically analyze results, and control documents.	
 Developed an application to log work hours and increase accountability. 	
 Initiated the utilization of Macros in Google Sheets to increase productivity. 	
Lab Analyst	2021-2022
·	
 Collaborated with a team to develop algorithms and programs to automate data analysis. 	
unior Lab Analyst	2019-2021
statistically analyze results, and control documents. Developed an application to log work hours and increase accountability. Initiated the utilization of Macros in Google Sheets to increase productivity. Lab Analyst SGS (Société Générale de Surveillance) Callao, Peru Devised algorithms in Excel to optimize procedures by converting manual workflow into a digital format.	
 Introduced Power BI Desktop for KPIs in SGS to efficiently consolidate data.

for both the business and clients, which resulted in improved KPIs.	
Google Sheets Macros:	2022
JavaScript in Google Sheets for Macros. Developed criteria to analyze and evaluate worker performance in	

Python Data Analysis: Program using Python and SQL to process the data, alerts when an error is detected. As a result, work efficacy increased by over 120%.			2022				
Excel Data Analysis: New models of Excel sheets, using criteria to develop algorithms which improved efficiency by more than 120%. Power BI for KPIs Deep Process Modeling with Power Query, Metrics with Dax, and visualization. Produced workflow insights and increased productivity. Granulometry Analysis Macros: Macros with VBA in Excel. Programed relevant criteria to easily analyze and visualize data, which increased productivity over 200%.			2022 2021 2021
